

Centauri Advance[®]

Centauri Advance is purpose-built to optimize retrospective and prospective efforts for health plans and provider organizations. Based on operational experience in Medicare Advantage, Marketplace, and Medicaid programs, Centauri Advance is designed specifically for risk adjustment programs.

RISK ADJUSTMENT

Retrospective and Prospective programs, HHS HCC, CMS HCC, and CDPS/Other Models

- Dashboards provide consistent view of work flow across your entire risk adjustment campaign
- Designed for collaboration; work flow can be integrated between Centauri, our clients, and their vendors
- Medical record repository for crossfunctional support across all risk adjustment activities, including retrieval, abstraction, and coding
- End-to-end management of retrospective campaigns as well as prospective home health assessment campaigns

CENTAURI ADVANCE®

Our core platform is completely agnostic in terms of the source of data we can receive and integrate. This enables our Centaury Advance workflow tool to consume as much data as provided; there is also no limit to the supplemental data that can be integrated.

FEATURES

- Robust data integration capabilities with workflow software
- Immediate access to all risk adjustment activities
- Executive Dashboard Level scheduling, chart and outcome reporting
- Automated proprietary rules-based fax engine
- A robust provider office issue Management Workflow between Centaury and clients
- Supports natural language coding and computer-assisted coding (NLP-CAC)

BENEFITS

- Full visibility into the details of risk adjustment activities and interactions
- On-the-fly editing of provider/location affiliations during outreach
- Easily oversee and manage all retrieval efforts
- Easily manage follow up reminders for any partially completed submission
- Resolve provider issues quickly
- Transparency to monitor coding productivity to goal and evidence of oversight
