Centauri Coding™

Centauri's risk adjustment medical record coding module was created by coders for coders. Providing full transparency of all coding activities, clients have visibility and access to quality assurance results and coding throughput as well as audit management tools built within the platform.

Performed on the Centauri Advance® platform, we offer a stand-alone Software as a Service (SaaS) solution, which gives you the option to internally manage your risk adjustment coding program.

centaurihs.com

MEDICAL RECORD CODING SERVICES

Retrospective and Prospective programs, HHS HCC, CMS HCC, and CDPS/Other Models

- **Data Integration:** Robust capabilities with workflow software and end-to-end data-sharing.

- **Data Error Identification:** Eligibility and claims data with errors are identified on the inbound file

- **Collaborative Design:** Workflow designed for integration between Centauri, our clients, and your vendors.

- **Approach:** Our coding approach is applicable to and effective for both targeted and blind coding.

Centauri Coding™

Whether you manage your own coding program internally or Centauri does it for you, our platform is offered either á la carte or as an end-to-end solution and supports retrieval, coding, risk adjustment gap identification and submissions.

Our risk adjustment coding program ensures that our analytic inputs are performed in accordance with all state and federal regulations and CMS calendar deadline requirements. Centauri performs coding with an accuracy rate which on average exceeds the CMS standard.

FEATURES & BENEFITS

- **Innovation:** Our software offers the ability to code with or without an image. We understand that teams increasingly need to code regardless of the validation method.

- **Transparency:** Any code that is identified on a claim, but not substantiated during the chart review, will be visible.

- **Data Quality:** We understand and apply best practices regarding the capture of a full data set that can be used for coding, quality and data reporting within our application in a fully compliant manner.

- **Standard Practices:** Support the standard coding approach that coding every date of service (DOS) and all diagnosis codes are based on the Official Guidelines for Coding and Reporting, AHA Coding Clinic guidance, and CMS guidance.

- **Natural Language Processing:** Ability to partner with any best in class NLP vendor to incorporate coding with NLP functionality.

- **Audit Management:** Multiple sampling methods for audit oversight including unlimited levels of review.
