

Centauri Relay®

Centauri's Relay engine was built to ensure compliant and accurate submission of encounter data to CMS for RAPS/EDPS. Empowered by Relay, our experienced team works with clients to develop a customized roadmap for complete, accurate and timely data submission.

Centauri recognizes that each client's deployment of staff, process and technology requires a tailored solution. We work collaboratively to address data quality issues, implement industry best practices and enhance revenue integrity operations.

SUBMISSION RAPS/EDPS

- Tailored Planning: Upfront data analysis and collaboration with client teams to create a complete process for submission, reconciliation and remediation that is unique to each client.
- Data Validation: Our engine performs a validation of data against CMS rules prior to submission to ensure maximum acceptance by CMS, and full reconciliation for EDPS and RAPS.
- Impact Analysis: For those encounters that do not pass validation rules, we provide reporting that quantifies the cost in risk-adjusted dollars, as well as EDPS and RAPS comparative analytics.

CENTAURI RELAY®

Our Encounters team has more than 100 years of combined experience and a unique understanding of revenue cycle management. Our deep expertise extends beyond EDPS, RAPS and the risk adjustment end of the cycle and allows for valuable insight.

We understand how issues at the front end of the revenue cycle impact the back end, including EDI, enrollment operation, provider systems administration and claims operations. That allows Centauri to work with clients to create comprehensive solutions that address business issues across the revenue cycle, ensuring risk adjustment compliance and payment accuracy.

FEATURES & BENEFITS

- **Transparency**: Centauri's dashboard reporting enables actionable insights to make modifications to the deployment of people, processes and technology as necessary to improve submission completeness and accuracy.
- Flexibility: We quickly address unique data quality issues by custom interventions such as enrichments and transformations to assist clients in reducing their rejection rates.
- Collaborative: Centauri understands that this is not a "set it and forget it" process. The process of submission, reconciliation and remediation is iterative and requires a very specific type of expertise to ensure that it is done timely and accurately.
