QUALITY

Certified HEDIS Reporting Measurement, Submissions and Audit Support

- Certified for 83 HEDIS 2019 measures and systematic sampling, for our HEDIS product; we host, validate and process HEDIS results.
- We have been National Committee for Quality Assurance (NCQA) Certified Since 2006.

CENTAURI ASCENT®

Our Centauri Ascent quality tools are used to collect and measure data quickly and accurately to produce HEDIS and 5-STAR reports which identify gaps in care throughout the year. We give our clients the ability to focus their resources on closing the most impactful gaps.

Precise© – HEDIS Data Management and Report Solution

- Reviews millions of claims quickly & accurately
- Allows multiple views into the data and population with drillable & customizable robust reports
- Provides audit support for all members and measures

Advance ChartNet© – HEDIS Chart Management Solution

- Simplified, easy-to-use chart review interface offers web- based tool with real-time scoring
- Provides integrated chart scanning, annotation and note taking
- Chart requests are faxed directly to providers from the tool

Care Gap Finder©

- Proactively reports gaps in care throughout the year
- Flexible scheduling of reports based on client need
- Tracks and trends results over time
- Includes provider-level profile reports comparing results to peers and to prior performance.

FEATURES

- Identification of members who have missing conditions and highest opportunities for successful care gap closure and risk adjustment gaps
- Flexible measure architecture
- Algorithms/source code designed for calculations of HEDIS and non-HEDIS measures
- Access to Provider scorecards
- Integrated, prioritized and segmented reports
- Ability to predict how members would respond to outreach, and pinpoint which members would most greatly impact the organization's bottom line
- Easily create state and custom measures, including hybrid measure development

BENEFITS

- Potential improvement opportunities allows for chase lists optimization
- Evidence-based clinical coding documentation, ensures that diagnoses and related condition codes meet audit requirements
- Access to member, provider, and provider group level drill-down views as well as combined scores
