

HEDIS®

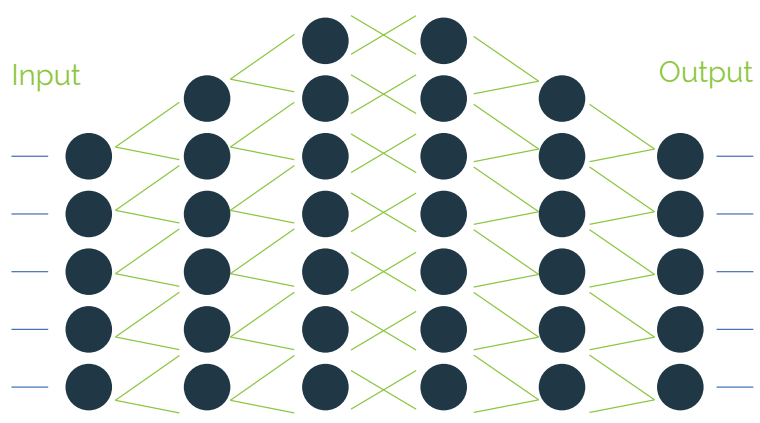

Powered by Centauri Insights®

Increase the value of your HEDIS campaign. Identify which members will most greatly impact the organization's bottom line. **-With Greater Accuracy.**

Targeted Member-Level Analytics

- Can your team identify and quantify members with the highest gaps and therefore highest-value within your population?
- Are you able to focus your internal resources on closing the most impactful HEDIS gaps?
- Can you demonstrate year-over-year improvements you've made to quality of care outcomes during the HEDIS season?

Using Artificial Intelligence (AI) means that clients can access AI-driven analytics to demonstrate member and provider-level results. Combine peer and prior performance comparisons with provider scorecards to schedule and produce flexible custom reports. Gain a complete view of improvement opportunities.

Built on a foundation supported by AI, NLP, Machine Learning and Deep Learning

We start with the following Types of Input

- Integrated Data Assets**
- Health Plan Data Sources
 - Supplemental Data Sources
 - Additional External Data Sources

The results of our output means that you receive

Optimized clinical gap identification based on and supported by intelligent AI-driven analytics.

**POWER TO SOLVE.
PASSION TO SERVE.**

Advance your knowledge of your member population

Zero in on members with the most impactful gaps. Centauri's use of AI means that we apply advanced machine learning algorithms to our robust HEDIS certified measure data sets.

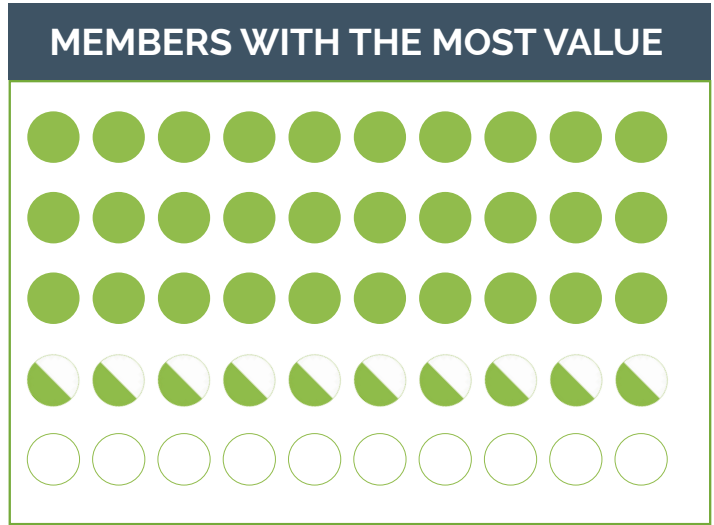

Leverage the Power of Centauri Insights

Centauri Insights reveals gaps in care for the highest possible opportunities for successful care gap closure. Potential Improvement opportunities allows for refinement of quality initiatives. Our AI-driven analytics proactively reports gaps in care throughout the year and tracks and trends results over time.

Integrate, Prioritize and Segment Reports

Identify gap closure opportunities with each member. With access to member, provider, and provider group level drill-down views, you will have the ability to create actionable reports. Internally audited clinical documentation from chart abstraction activities, ensures compliance with HEDIS audit standards.

Centauri's AI-driven analytics will help you turn data into action. Prioritize the right combination of services for each unique plan member.
