The Centauri Platform

Risk Adjustment. Quality. Analytics. Submissions.
A web-based workflow tool that supports the integration of HEDIS and Risk Adjustment for retrospective and prospective activities.

Our investments in technology, data and human interaction help to reimagine and build a healthcare system that makes a real difference in the lives – and work – of those who count on it. And increases access to, and the delivery of, proper care.

FEATURES

- Robust data integration capabilities with workflow software and end-to-end data-sharing
- Identification of eligibility and claims data with errors on the inbound file
- Flexible measure architecture designed for calculations of HEDIS® and non-HEDIS measures
- A robust provider office Issue Management Workflow between Centauri and clients
- Ability to perform on-the-fly editing of provider/location affiliations during retrieval outreach
- Full visibility into the submissions lifecycle for RAPS and EDPS

BENEFITS

- Full visibility into the details of risk adjustment and quality gap closure activities and interactions
- Recognition and retrieval of only those medical records that are risk adjustment eligible
- Assists in closing gaps in care and improving quality scores
- Easily create state and custom measures, including hybrid measure development
- Potential improvement opportunities allow for chase lists optimization
- Easily manage follow up reminders for any partially completed submission

CENTAURI

HEALTH SOLUTIONS ®

CENTAURI PLATFORM®
CORE PRODUCTS AND SERVICES

CENTAURI ADVANCE®

RISK ADJUSTMENT

Retrospective and Prospective programs, HHS HCC, CMS HCC, and CDPS/Other Models

Offered as a stand-alone Software as a Service (SaaS) product providing full transparency of all risk adjustment and care gap management activities, the Centauri platform gives you the option to manage your risk adjustment and quality programs internally.

CENTAURI ASCENT®

QUALITY

Certified HEDIS® Submissions, HEDIS Audit Support

Our core platform is completely agnostic in terms of the source of data we can receive and integrate.This enables our system to consume as much data as provided; there is also no limit to the supplemental data that can be integrated.

CENTAURI INSIGHTS®

ANALYTICS

Suspecting Risk and Quality Care Gap Management; Risk/Revenue Forecasting

Designed for collaboration; work flow can be integrated between Centauri, our clients, and their vendors.

CENTAURI RELAY®

SUBMISSIONS

RAPS/EDPS and State Medicaid

Dashboards provide consistent view of work flow across your entire risk adjustment and quality campaigns, including HEDIS and 5-STAR Quality Program.
