

HEDIS/Quality Solution

Solution Overview

NCQA Certified measure engine to calculate HEDIS based measures, P4P, state and custom measure calculations

Retrospective and proactive analytics and reporting around gaps in care, supporting outreach, trending, and revenue projections for P4P programs

SaaS platform to support the HEDIS and year-round medical record projects with optional abstraction and retrieval services

Documentation to support the HEDIS Roadmap and other auditor requirements

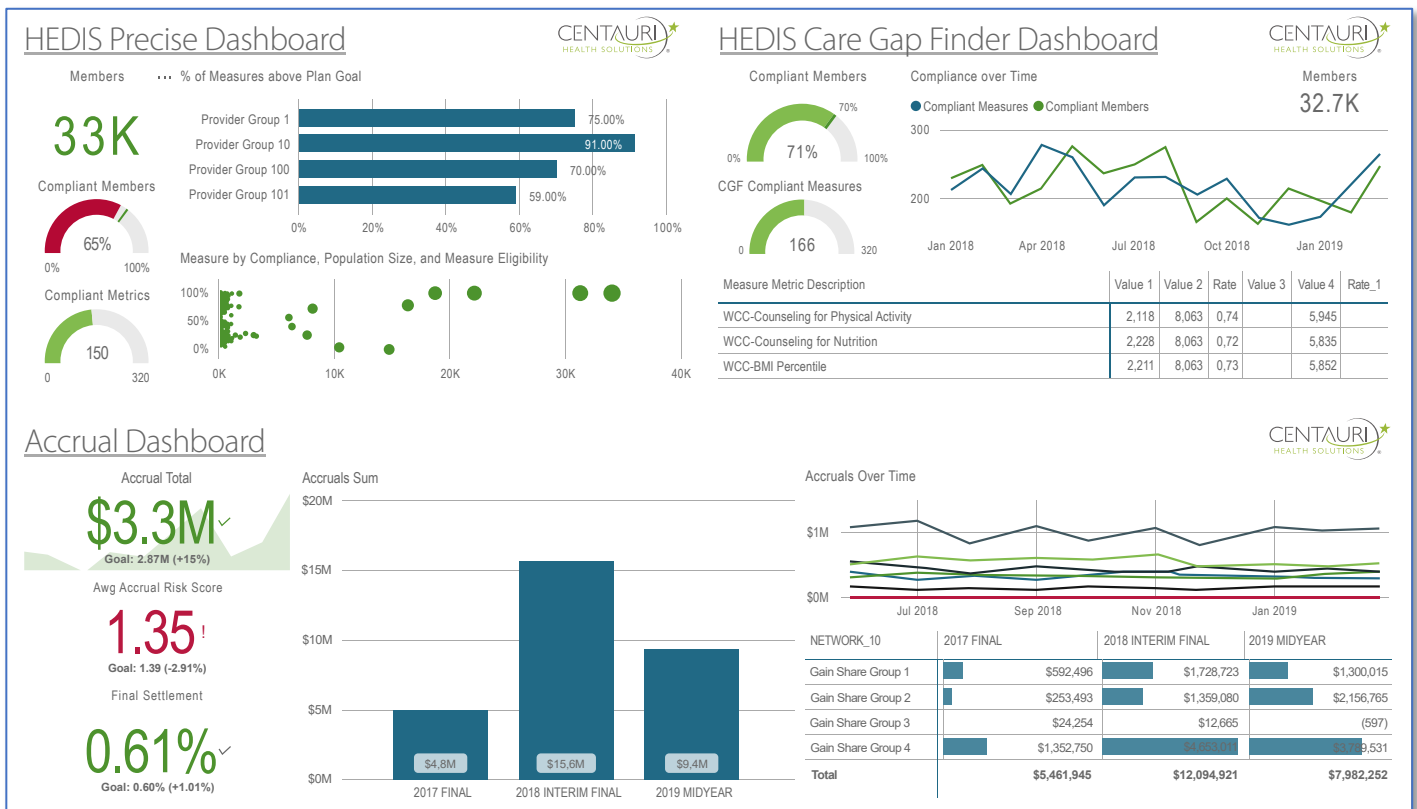

Key Differentiators

- HEDIS® certified since 2006; one of the longest certified engines
- Highly customizable rules engine to provide NCQA, P4P, State and Custom measures
- Decades of deep expertise in HEDIS and Quality measurement
- HITRUST Certified to ensure information security regarding compliance, risk and liability with our healthcare industry partnerships
- Industry leading technology and speed due to advanced clinical rules engine
- Single-sign-on medical record management solution to support the end to end MRR project
- Ability to run ad-hoc analysis on quality scores

Benefits

- Integrated chart repository allows for medical records to be used across HEDIS and Risk Adjustment initiatives
- Report suite provides for ad hoc report customizations with the ability to view summary level results and drill into provider and member details
- Industry leading HEDIS and Quality Improvement expertise ensures a successful MRRV audit and submission of IDSS and/or PLD files
- Medical record project workflow design purpose-built to manage nuances around provider outreach to reduce abrasion
