

## Risk Adjustment Solution

### Solution Overview

- 1 Execute rules and Machine Learning-based models to find members with data gaps impacting risk adjusted revenue
- 2 Manage outreach campaigns to Provider offices and hospitals, and retrieve medical records to establish documentation for diagnosis codes
- 3 Provide certified medical record coding staff to abstract medical records and collect diagnosis codes for risk adjustment submission
- 4 Certified submitter for Medicare Advantage RAPS and encounter submissions to CMS
- 5 End-to-end SaaS platform for entire risk adjustment solution cycle. Analytics to support revenue accrual and financial reporting

### Key Differentiators

- Decades of deep expertise in Medicare Advantage, Managed Medicaid and Commercial
- HITRUST Certified to ensure information security regarding compliance, risk and liability with our healthcare industry partnerships
- Full transparency for all vendors optimizes retrospective efforts from health plans
- Single-sign-on solution integrates with client platform for seamless interaction between applications
- Multiple modes of record retrieval that maximizes retrieval rates and minimizes provider abrasion
- Comprehensive risk adjustment services to encompass CMS, HHS, Medicaid, RADV and IVA audit support

## Benefits

- Allows management of campaigns across multiple vendors and provides complete visibility into campaign status in real-time
- Highly collaborative workflow and software design improves client interaction, visibility and yield
- Industry leading medical record coding expertise ensures submitted diagnosis are compliant and supportable during CMS data validation audits
- Workflow design purpose-built to manage nuances around provider outreach to reduce abrasion
- Tracks and trends results over time while producing provider level profile reports comparing results to peers and prior level performance

## Reporting

The image displays two screenshots of the Centauri Health Solutions software interface. The top screenshot shows the 'Retrospective Progress' dashboard with various metrics and charts. The bottom screenshot shows a 'QA Coding Report' table.

Picker Name	Coded Charts	Total Page Count	QA Charts	% QA Charts	Total Dx Coded	Total Dx Confirmed	Total Dx Added	Total Dx Removed	QA Accuracy Rate
1. Coder: Level 1	2	30	1	50%	5	1	2	2	20%
2. Coder: Level 2	15	147	0	0%	0				
3. Coding Manager	1	0	0	0%	0
