CENTAURI HEALTH SOLUTIONS®

POWER TO SOLVE | PASSION TO SERVE

HEALTH PLAN SOLUTIONS

Centauri's health plan solutions offer clients support through sophisticated analytics and partner with them to improve the lives and health outcomes of their members and patients.

Centauri Health Solutions brings decades of knowledge and experience to our payor and provider clients. Our health plan focus areas include: Risk Adjustment, Risk Analytics, Quality Program Support, and Eligibility Enrollment for Duals, SSI and SSDI. We help ensure our clients receive accurate reimbursements and that their members realize quality-of-life improvements.

ELIGIBILITY & ENROLLMENT

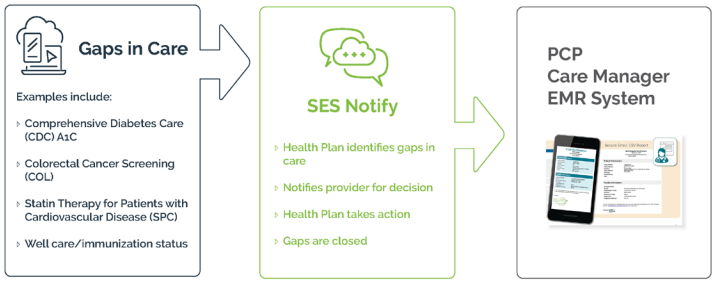

For more than 35 years, we have been a trusted partner for increasing revenue and cost of care savings for health plans, while adding life-enhancing benefits to members' lives.

- **Best Benefits — Disability Eligibility & Enrollment:** We are the nation's leader in SSI eligibility and enrollment for Medicaid Managed Care Plans. We have delivered over $2 billion in health plan revenue and member payments.
- **PremiumAssist — Dual Eligibility & Enrollment:** We also lead the way in dual eligibility outreach, enrollment and redetermination services for Medicare Advantage Plans and redetermination services for dual Special Needs Plans. Our proactive retention strategy reduces traditional fall-off rates by half and improves overall retention.
- **Medicaid Redetermination:** Centauri is actively assisting health plans in 20 states with outreach, assessment, and application/submission assistance for their members. Our services minimize the disenrollment of eligible members and the revenue associated with them due to the end of continuous enrollment.
- **Analytics:** Industry-leading algorithms deliver member-level precision targeting based on a combination of clinical and non-clinical conditions coupled with deeper machine learning methods.

QUALITY SUPPORT SOLUTIONS

With our experience in clinical data exchange supporting complex use cases and bi-directional exchange, we help health plans achieve higher scores, better reimbursements, and more incentives.

- **Data Capture:** Centauri captures medical record data from a provider's electronic medical record (EMR) system or from an aggregator partner (HIE/HIOs) using a variety of connectivity mechanisms to send C-CDA's to a health plan's secure endpoint and deliver normalized (CCD) and free-form information by leveraging each EMR system's capability.
- **Coding Support:** We can accommodate existing workflows and send information directly to internal and external coding teams.
- **Compliance:** We leverage existing ADT member monitoring and use the discharge as the triggering event to request a patient chart from existing data source partners. This data is delivered to both the health plan's enterprise platform and directly to the provider workflow in the EMR, satisfying the provider's need to receive relevant clinical information and keeping the health plan compliant with new Stars and HEDIS® requirements.

RISK ADJUSTMENT

Our end-to-end risk adjustment solution is purpose-built to optimize both retrospective and prospective efforts.

- **Retrieval:** Our medical record retrieval and review program captures every possible chart in a high-quality and compliant manner, with the least amount of disruption to each facility and physician. We utilize both secure electronic and manual retrieval methods.
- **Coding:** Our medical record coding tool is able to leverage NLP while providing full transparency and access to all coding activities. Our stand-alone Software as a Service (SaaS) solution – giving clients the option to internally manage their coding program.
- **Submissions:** Through our custom-built engine, our experienced team works with clients to develop a complete roadmap for accurate and timely data submission to CMS for encounter data.
- **Analytics:** The Centauri Insights® Suite is built from a powerful healthcare data analytics engine, leveraging data insights methods to target member conditions, risk adjustment and quality gaps – allowing plans to allocate the right resources to the right members at the right time.
