

Spot Dual Eligibility Early to Align Coverage and Care

Identify earlier.
Intervene sooner.
Retain longer.

Using probabilistic modeling, Centauri helps health plans identify members who may qualify for Full Dual, Partial Dual, or LIS benefits and continuously monitors for signals that existing eligibility or coverage may be at risk. That gives plans an opportunity to prioritize outreach earlier, before a missed opportunity becomes a coverage gap.

Proactive Identification, Paired With Real-Time Monitoring

Probabilistic Modeling

Applied to accurately identify members who may qualify for Full Dual, Partial Dual, or LIS benefits.

Risk Signal Detection

Surface members at risk of losing eligibility, care interruption, or disengagement.

Real-Time Insight

Deliver insight at the moment it matters, so plans can intervene before gaps occur.

Move from static eligibility information to proactive member intervention

Target Smarter, Not Harder

Identifies **nearly 99% of duals** within the top five deciles of the non-dual population so plans can focus outreach on a smaller, higher-probability population instead of treating every member as equally likely to qualify.

Risk Monitoring

By connecting clinical events, eligibility changes, and social needs, Centauri surfaces members at risk of losing eligibility or disengaging.

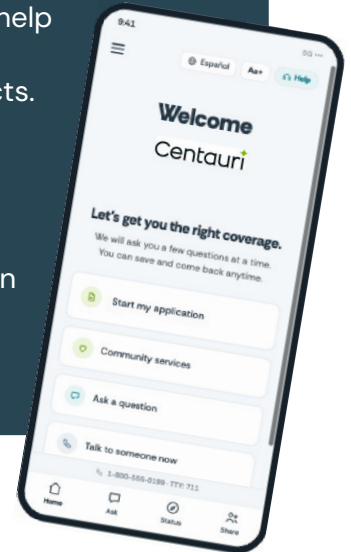

Act at the Moment It Matters

Insight delivered in real time lets plans intervene earlier, reducing churn and improving coordination across the member's full care and coverage journey.

Centauri's Member Self-Screening App

Members can take control of their healthcare journey, carry their own history, and help reduce repetitive outbound contacts.

What was once a transactional touchpoint transforms into an ongoing member relationship.

Built for Regulated, High-Stakes Programs

As a HITRUST r2-certified, audit-ready solution, Centauri's Dual Eligibility program is flexible, scalable, and requires minimal administrative lift.

Who We Serve

Medicare Advantage plans and Medicaid managed care organizations rely on Centauri to identify, monitor, and support members who qualify for Full Dual, Partial Dual, or LIS (Extra Help) benefits.

See how Centauri turns eligibility signals into earlier action.
